Git

EXPERIENCE

FULL STACK SOFTWARE DEVELOPER

Nashville Software School | May 2018 - Nov 2018

Intensive full-time software development bootcamp focusing on full stack development fundamentals and problem solving. The final half of the program executed in a simulated company environment with Scrum methodology.

- Hands on application of OOP fundamentals through group and individual projects reflecting real world business problems
- Source code version control with Git/Github
- Project management/tracking with Trello and Github Projects & Issue Tracking
- JavaScript fundamentals leveraging DRY, modular, readable code and reusable components
- Built browser-based single page applications using ReactJS, HTML, CSS, and jQuery
- Task automation with Grunt: Linting with ESLint, module bundling with Browserify
- Use of CSS frameworks and React styled component libraries
- Deployment of applications through AWS EC2 using NGINX, AWS S3, and Heroku
- Unit testing to write testing suites
- Application design through white boarding dependencies and building ERD's
- Created and modified database design/content using SQL, ADO.NET, and ORM tooling including expsoure and experience with migrations
- Created RESTful APIs with C#/.NET using WebAPI
- Leveraged Razor for creating and editing MVC applications

PROJECTS

TVOS MARKETPLACE

<https://tvosmarketplace.tk>

Online marketplace for members of the Tennessee Viticultural and Oenological society for amateur winemakers. Built using ReactJS and Material UI and deployed to AWS EC2 with NGINX.
